THE KANSAS CONFERENCE IN CLINICAL CHILD AND ADOLESCENT PSYCHOLOGY:
TRANSLATING RESEARCH INTO PRACTICE

WELCOME

Welcome to the University of Kansas for the 2002 Kansas Conference in Clinical Child and Adolescent Psychology. KU is the home of the Jayhawks, but not of Dorothy and Toto.

Founded in 1854 by anti-slavery groups, Lawrence quickly became a hotbed of "free-state" supporters. Undaunted by the burning of their town by Quantrill's raiders in 1863, Lawrence residents welcomed the establishment of a state university atop Mount Oread in 1865. Lawrence has been the residence of many notables, including John Brown, Langston Hughes, William S. Burroughs, James Naismith, and Comanche.

The University of Kansas has a long tradition of scholarly contribution to child and developmental psychology through its Department of Human Development and Family Life and in clinical psychology through its Department of Psychology. In the past 11 years, an interdepartmental effort has developed the Clinical Child Psychology Program, using faculty and resources in both departments while bringing in new faculty and students for the graduate training program in the specialty. This conference is a project of the Clinical Child Psychology Program; we hope you will become familiar with our activities and assets while you're here.

The conference is co-sponsored by the Society of Clinical Child and Adolescent Psychology (Division 53 of the American Psychological Association). The division publishes the *Journal of Clinical Child and Adolescent Psychology*, provides programming at the annual convention of the American Psychological Association, and supports task forces and activities on professional issues in child and family mental health services. Membership information will be available at the conference displays.

Additional financial support for this year's conference is provided by the University of Kansas Office of Academic Affairs and College of Liberal Arts and Sciences. We gratefully acknowledge their substantial support. KU Continuing Education has also provided subsidies to this conference. The conference fees would be much higher without these contributions, so we particularly thank these units for their assistance.

We hope you find the conference informative and enjoyable. Our aim is to give you a useful integration of research and practice in clinical child psychology. Please call on the faculty and students of the Clinical Child Psychology Program if you need assistance. They are identified by special emblems.

Sincerely,
